

Walsall Libraries- How to connect to WiFi

WiFi access is available at all our branch libraries

You do not need to be a library member to access our WiFi

Search for the Wireless Network “Buzzard” & connect

This screen will appear when you open your Internet browser.

This is our user policy. Please read it and then scroll down and click on “accept” to continue. A hard copy is available at the counter should you wish to view it.

You will then be able to connect to the Internet through Wifi for as long as you want.

The default homepage is Google but from there you can browse to other pages.

A limited number of mains power points are available for laptop connection (identified by a poster above them). Please do not use any other power sockets for your laptop and due to safety concerns do not trail any cables or create any trip hazards.

We are unable to offer technical help with your laptop and connection to the Wireless network. No extra software will be installed on your laptop.

Filtering

This Internet connection is filtered

If sites are blocked you will see this message.

Please let the library staff know of any problems or comments so that we can improve the operation of this service.
